Prior Experience

IT Specialist, February 2018 - May 2020
PayTomorrow Finance, Cornelius NC
- Had a wide range of responsibilities including writing SQL queries, collections, IT support, repairing computers, and customer service. Co-managed the aftermarket reselling of gaming desktops and laptops as well as other consumer products.

Sales Representative, December 2017 - February 2018
Capstone Consultants, Charlotte, NC
- Sold AT&T products door to door.
- Trained others how to do door to door sales.

Past Projects

Mundane Heroes Forums, A forums system for a tabletop game I made called Mundane Heroes. The site uses Oauth2 for security. I built it with Spring Boot, AngularJS, Postgres, Oauth2, CSS3 and HTML.

Spring Chess, An online chess game that you can play on my website. It includes a chat feature and is multiplayer. I built it using Spring Boot, AngularJS, Postgres, CSS3, and HTML.

Account Repository, A rest repository with CRUD functionality. The front end and backend are separate microservices linked together with CORS. I built it using Spring Boot, AngularJS, CSS3, and HTML.

Java Checkers, A java application for playing checkers against an ai. It features a GUI made with AWT and Spring. I built it with Java.

These projects as well as others can be found here. https://github.com/criticalJazz/Eportfolio

Education

Bachelor of Science Computer Science
University of North Carolina Charlotte, 2013-2017
